DETAILED ACTION

Interference

Claim Objections

1. Claims 85-89 of this application have been copied from U.S. Patent No. 6,110,146 for the purpose of an interference.

2. Claims 85-89 are objected to because of the following informalities:

Applicant has failed to specifically apply each limitation or element of each of the copied claim(s) to the disclosure of the application.

Applicant has failed to suggest an interference that complies with new rule effective on 9/13/04 (Rule 41.202 Suggesting an interference). Applicant fails to:

- ☐ Propose counts and show how the claims correspond to one or more counts
- ☐ Provide a claim chart comparing claim of each party corresponding to the count and show why the claims interfere,
- ☐ Explain in detail why the applicant with prevail on priority
- ☐ Provide a claim chart showing the written description for each claim in the application's specification and
- ☐ Provide a chart showing where the disclosure provides a constructive reduction to practice within the scope of the interfering subject matter.

Appropriate correction is required.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 85-89 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of U.S. Patent No. 6,416,529; over claims 1-35 of U.S. Patent No. 6,152,944; over claims 1-17 of U.S. Patent No. 6,132,450; over claims 1-26 of U. S. Patent No. 5,893,868. Although the conflicting claims are not identical, they are not patentably distinct from each other because they contain the same subject matters: a flared sleeve with a slit extending therethrough and the slit either extending along a plan that includes a longitudinal axis of the tube or helical and a second sleeve including a slit disposed around the flared sleeve.
